

Sustainability Policy

S P SETIA'S SUSTAINABILITY APPROACH

As a leading property developer in Malaysia, S P Setia strives to create lasting value for stakeholders while prioritising social and environmental responsibility. Through our vision of creating sustainable communities, we wish to build a future that benefits both the environment and humanity.

OUR COMMITMENTS:

1. To aspire and commit towards 'Net Zero Carbon Emissions by 2050'. Guided by our Green Roadmap, we aim to reduce emissions, embrace renewables, and foster innovation.
2. To uphold Governance Practices with the utmost integrity in all our operations and interactions, ensuring unparalleled transparency, accountability, and ethical conduct.
3. To safeguard against greenwashing, maintaining transparency in our sustainability disclosures, and ensuring our actions align with our stated values.
4. To uphold fundamental principles of human and workplace rights in all our operations.
5. To integrate sustainability management into the culture, business activities, and decision-making processes, we prioritize practices that align with environmental, social, and governance (ESG) principles.
6. To anticipate and respond to the changing economic, environmental, social and governance landscape, and regulatory proactively.
7. To continuously strive towards strengthening the sustainability management practices through continuous learning and improvement.
